Subject: WLL Status for SMT

Jeff,

Completions last week

1. March 20 – Alternative Treatment Technology – SF approved the draft RIM treatment technology work plan (SSFS document)
2. March 20 – Phase 1D Investigation Work Plan addendum received and under review by EPA, USACE and MDNR (pushing for 1 week turn around).
3. March 23 – Pyrolysis team meeting, calls, contract lab identified and OSC James Johnson and RPM working on START task order mod.
4. March 23 – Additional Characterization work strategy and ORD statistical analysis discussed with Dave Kappelman. RPM requested his review/approval with this approach with email and copy to Doug Ammon for documentation.
5. March 25 – Partial Excavation Work Plan – Program provided CNSL with bullets to describe the work we are requesting of the parties and will incorporate those into a letter to the PRPs that she is drafting for the additional sampling. This letter will set the stage for a meeting between the PRPs and EPA to further define the work.

Completions for this week:

6. March 30 or 31 - Phase 1D Work Plan Addendum – Sent approval letter with comments and schedule technical follow up call with EMSI
7. Pyrolysis – Finish scoping out START Task Order for modification and IGCE
8. Additional RIM Characterization – Received Kappelman's review and schedule call with HQs.
9. April 3 - Partial Excavation Work Plan – Send letter to PRPs
